EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

2. Authorization for this examiner's amendment was given in a telephone interview with Robert A. Voigt, Jr. (Reg. No. 47,159) on 4/26/07.

3. The application has been amended as follows:

In the claims:

- a. In claim 1, line 4
 - i. Insert after "accessed" – by said server blade –;
- b. In claim 8, line 5
 - ii. Insert after "accessed" – by said server blade –;
- c. In claim 15, line 15
 - Insert after "accessed" – by said server blade –;

2. The following is an examiner's statement of reasons for allowance:

The prior arts of record do not explicit teach or render obvious the invention as recited in the independent claims.

Art Unit: 2195

The Kusters (U.S. Pat. No. 5,819,112) prior art discloses receiving I/O request packets to access one or more shared peripheral devices connected via the parallel port from a computer server system. Kusters teaches an allocate command and a class driver that issues the allocate command to determine whether the parallel port is currently busy. If the parallel port is not free, then the class driver inherently receives a response to the allocate command indicating the parallel port is not free and a signal from a port arbitrator. However, the invention as claimed “issuing a query as to whether said shared device is being accessed by said server blade” when taken in the context of the claims as a whole, was not uncovered in the prior art teaching.

Nor were references uncovered that would have provided a basis of evidence for asserting a motivation that one of ordinary skill in the art at the time the invention was made, knowing of receiving I/O packets to access one or more shared peripheral devices and determining the availability of the devices connected to the parallel port, would have integrated or modified to teach the method for automatically switching remote shared devices in a dense server environment comprising the steps of receiving a request to access a shared device from a server blade, issuing an access query to determine availability of the shared device.

Dependent claims are allowed as they depend upon allowable independent claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
